SUMMARY

Final-year Computer Science graduate with strong Python and Data Structures and Algorithms fundamentals. Built generative AI applications using LangChain and Gemini, and trained an unsupervised machine learning model for anomaly detection. Comfortable working in Agile teams and using AI-assisted coding tools.

EDUCATION

Rajeev Gandhi Memorial College of Engineering and Technology

Bachelor of Technology in Computer Science, Data Science – GPA: 8.90 / 10.0

Aug 2022 – Apr 2026

Nandyal, Andhra Pradesh

RELEVANT COURSEWORK

- Data Structures and Algorithms
- Software Engineering
- Database Systems
- API Development
- Data Analytics
- Object Oriented Programming
- SDLC Concepts
- Cloud Computing

TECHNICAL SKILLS

Data Structures and Algorithms: Problem Solving, Algorithmic Thinking, Time and Space Complexity Analysis

Generative AI and LLMs: LangChain, Google Gemini API, Prompt Engineering, AI-Assisted Coding (GitHub Copilot, Claude, GPT)

Machine Learning: Unsupervised Learning (Isolation Forest), Model Training and Evaluation, spaCy

Programming: Python, Java, JavaScript, SQL, Object Oriented Programming

Backend and Tools: FastAPI, REST APIs, PostgreSQL, Docker, Git and GitHub

INTERNSHIP

Software and Analytics Intern

IIITDM Kurnool – HPC Workload Analytics Platform

Dec 2025 – Apr 2026

Nandyal, Andhra Pradesh

- Analyzed 400K+ HPC job records to identify performance issues, applying structured problem-solving in an iterative, sprint-style workflow.
- Identified 3 root-cause failures and validated fixes, cutting GPU idle time by 20 to 30 percent over 6 weeks.
- Documented SOPs, incident logs, and technical findings clearly for both technical and non-technical stakeholders.
- Automated recurring workflows using Apache Airflow, reducing manual effort across the team.
- Coordinated with sysadmin and research teams to confirm requirements and communicate results.

PROJECTS

AI Resume Screening Platform – Generative AI Integration

[GitHub Link](#)

- Built a generative AI pipeline using LangChain and Google Gemini to parse and match resumes against job descriptions, applying prompt engineering to improve output accuracy.
- Developed the backend with FastAPI, PostgreSQL, and Redis, using AI-assisted coding tools to speed up development and debugging.

Real-Time Fraud Detection System – Machine Learning Model Development

[GitHub Link](#)

- Trained and evaluated an unsupervised Isolation Forest model for anomaly detection, combined with rule-based scoring behind a REST API.
- Reached 100 percent fraud recall and a 4.2 percent false positive rate across 11,595 screened transactions through iterative model evaluation.

CERTIFICATIONS

Data Engineer (DataCamp) | **SQL Associate** (DataCamp) | **AWS Cloud Practitioner** (Amazon) | **Java Full Stack** (Wipro TalentNext)

ACHIEVEMENTS

- Academic Excellence Award – top 5 percent of department by GPA, no backlogs.
- Smart India Hackathon National Finalist – built a working app in 36 hours with a 4-person team.
